MYHEALTHCLINIC

Safety Measures & Protocols

All clinic visitors will be tasked to answer the online Health Risk Assessment questionnaire on the day of their visit.

The form can be answered right before going to the clinic branch or right before entering. Here is the link to the questionnaire: https://www.myhealth.ph/rhaq/

We respectfully deny entry to those that fall under any of the following:

 Deemed as health risk after answering the Health Risk Assessment questionnaire

 Not wearing surgical face mask and full face shield

Both must be worn in the clinic premises at all times. Cloth masks are not allowed.

- Presenting COVID-19 symptoms
 - (1) cough/colds
 - (2) fever of 37.5°C or above
 - (3) headache/fatigue
 - (4) diarrhea
 - (5) loss or decreased sense of smell and taste
 - (6) shortness of breath; and
 - (7) body ache/muscle pain
 - Violating MyHealth Clinic's safety measures and protocols

Proper physical distancing is enforced inside our clinics. The number of people inside are also limited to avoid any crowding.

Proper physical distancing is having at least one (1) meter of distance from another person. Our clinics also limit entrance inside the premises to around 20 patients at a time.

Here are other sanitation procedures as precautions:

- Stomp bath for shoe disinfection is provided at the entrance
- Cough & sneezing etiquette and proper handwashing is enforced
- Thorough disinfection of doctor's rooms after every patient
- Alcohol/sanitizer dispensers are placed all around the clinic

Self-registration kiosks and other mechanisms are in place for contactless transactions.

Quality and compassionate patient care is still ensured in clinics as all MyHealth personnel use protective gear and proper sanitation.

*These photos were taken early 2020. All our personnel and patients are **NOW REQUIRED** to wear both surgical face mask and full face shield inside the clinic.
